

2020 Public Opinion on Global Warming in New Hampshire

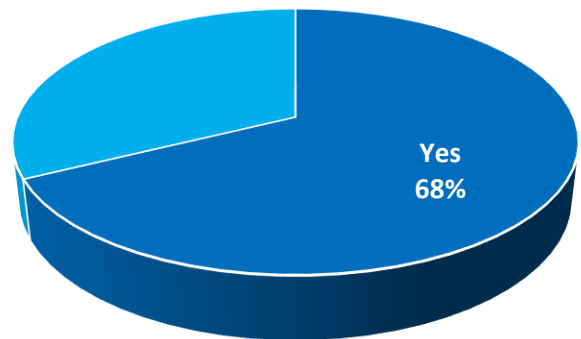

Stanford University conducted surveys that were used to generate measures of public opinion today.

Has Global Warming been Happening?

What is your personal opinion? Do you think that the world's temperature probably has been going up slowly over the past 100 years, or do you think this probably has not been happening?

Should U.S. Government do More to Address Global Warming

How much do you think the U.S. government should do about global warming? How much do you think the U.S. government is doing now to address global warming?

FUNDAMENTALS

- Warming will continue in the future: 76%
- Past warming has been caused by humans: 91%
- Warming is a serious problem for the U.S.: 87%
- Warming is a serious problem for the world: 87%
- 5 degrees of warming in 75 years will be bad: 72%
- U.S. government should limit greenhouse gas emissions: 84%

ENGAGEMENT

- Warming is extremely important personally (and is likely to influence voting): 26%
- Highly knowledgeable about global warming: 80%

POLICIES

- Reduce greenhouse gases from power plants: 90%
- Favor a national cap and trade program: 65%
- Increase CAFE standards for cars: 77%
- Build appliances that use less electricity: 78%
- Build more energy-efficient buildings: 74%
- Tax breaks to produce renewable energy: 88%
- Tax breaks to reduce air pollution from coal: 60%
- Tax breaks to build nuclear power plants: n/a
- Increase consumption taxes on electricity: 14%
- Increase consumption taxes on gasoline: 43%

METHODOLOGY:

New Hampshire public opinion was measured via a series of random digital dial telephone surveys and Internet surveys of nationally representative probability samples of American adults, statistically adjusting for interview mode and changes in opinions over time. More details on methodology can be found [here](#).
